Department of Archaeology

Workshops for graduate and undergraduate students

Digital Skills for Dissertations and Publications

Co–ordinated by D.I. Redhouse

Lent Term 2020

More information: https://www-comp.arch.cam.ac.uk/ds/

In Lent term the Department of Archaeology presents workshops for undergraduate students, graduate students and other interested parties that introduce software useful for structuring text, producing good quality illustrations (e.g. of sites, sections and objects), and analysing archaeological data. They will also introduce geographical information systems (GIS) for map–making and spatial analysis. No previous experience is necessary.

The modules offered are:

• Introduction to GIS
• Graphics and Type–setting
• Data Analysis

Data Analysis and Graphics and Type–setting each consist of four two–hour practical sessions on Tuesdays. Introduction to GIS consists of eight one–hour lectures and eight two–hour practic- als, on Mondays and Fridays respectively.
